

## Negative Emotions #2

Seven:20

**Note: This is not for trauma or phobia.**

**Procedure:**

1. "Just float up above your Time Line, into the past and down into the event—right into position C, looking through your own eyes, and (pause) when you're there, notice the emotion that's present."
2. "Float back up above the Time Line and go to position B, well before the beginning of the event, or any of the events that led to that event, and turn and look toward now. Ask your Unconscious Mind what it needs to learn from the event, the learning of which will allow you to let go of the emotions easily and effortlessly. Your Unconscious Mind can preserve the learnings so that if you need them in the future, they'll be there."
3. "Now where is the emotion? <sup>1</sup> Where did it go? That's right, it disappeared."
4. "Float down inside the event, to position C, looking through your own eyes, and check on the emotions. Are they there? Or have they disappeared! Now!! Good, go back to position B."
5. "Now, come back to now above your Time Line only as quickly as you can let go of all the ( name the emotion ) on the events all the way back to now, assume position B with each subsequent event, preserve the learnings, and let go of the ( name the emotion ) all the way back to now. (When Client is done) Float down into now, and come back into the room." (Break State)
6. Test: (Client back at now.) "Can you remember any event in the past where you used to be able to feel that old emotion, and go back and notice if you can feel it, or you may find that you cannot. Good, come back to now."
7. Future pace: (Client back at now.) "I want you to go out into the future to an unspecified time in the future which if it had happened in the past, you would have felt inappropriate or unwarranted ( name the emotion ), and notice if you can find that old emotion, or you may find that you cannot. OK? Good, come back to now."

<sup>1</sup> Note: If the emotion does not disappear, see 3 Things to Check at Position B and General Reframes.
